FACSIMILE OF THE CODEX VENETUS MARCIANUS 474 OF ARISTOPHANES

The photographic facsimile of this important MS. was undertaken jointly by the Archaeological Institute of America and the Society for the Promotion of Hellenic Studies, with the permission of the Government of His Majesty the King of Italy, and was issued in an edition of two hundred copies in 1902. The most of these have been sold. The price per copy of those that remain unsold is \$35.00 in portfolio, and \$36.75 bound in half-morocco.

The Codex Venetus Marcianus CCCCLXXIV is one of the oldest and best sources of the text of Aristophanes. It was written at the beginning of the twelfth century, contains seven plays, and is superior to all other manuscripts of this author in the number and quality of the scholia with which its margins are filled. It is indeed especially on account of the scholia that a reproduction was called for; for while the scholia of the Ravennas, though less valuable, have been edited in full, those of the Venetus, which are of prime importance for the criticism of Aristophanes, have never been adequately published.

The plates, 344 in number, were executed by the collotype process by the Oxford University Press from negatives taken by Signor Bertani of Venice. A full palaeographical introduction by Mr. T. W. Allen, Fellow of Queen's College, Oxford, is prefixed to the facsimile.
